RAJALAKSHMI NAGAR, THANDALAM – 602 105

BONAFIDE CERTIFICATE

Name : SHARVIN KUMAR

. . .

Academic Year :2025 Semester : 6 . . . Branch : . . CSE
. . .

Register No.220701507

*Certified that this is the bonafide record of work done by the above student in
the*

*.Laboratory during the
year*

20 - 20

Signature of Faculty in-charge

Submitted for the Practical Examination held on
. . .

Internal Examiner

**External
Examiner**

Dept. of Computer Science and Engineering | Rajalakshmi Engineering College

GUI Components

Aim

Develop an application to change the font and color of the text and display toast message when the user presses the button.

Procedure

Dept. of Computer Science and Engineering | Rajalakshmi
Engineering College

Android Fragments

Aim

Develop an android application to create two activities named as Student Basic Details (Register No., Name, Department) and Student Mark Details (SSLC, HSC, UG). Write an android code to combine these two activities in single screen using android fragment.

Procedure

AndroidManifest.xml

```
<?xml version="1.0" encoding="utf-8"?>
<manifest xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:tools="http://schemas.android.com/tools">

    <application
        android:allowBackup="true"
        android:dataExtractionRules="@xml/data_extraction_r
ules" android:fullBackupContent="@xml/backup_rules"
        android:icon="@mipmap/ic_launcher"
        android:label="@string/app_name"
        android:supportRtl="true"
        android:theme="@style/Theme.AndroidFragments"
        tools:targetApi="31">

        <activity
            android:name=".MainActivity"
            android:exported="true">
            <intent-filter>
                <action android:name="android.intent.action.MAIN" />

                <category android:name="android.intent.category.LAUNCHER" />
            </intent-filter>

### **SQLite**

#### **Aim**

Create a Database table with the following structure using SQLite: Student (Register Number, Name, CGPA). Develop an android application to perform the following operation using SQLite developer classes. 1. Insert student Details 2. Update the student Record 3. Delete a specified record. 4. View the details.

## Procedure

## Form Validation

### Aim

Design an android activity with two text boxes where the user can enter (username and ID) and a button (validate). Validate the entered username and ID field for the following using android code. i) Both the fields should not be empty ii) Name field should have alphabets iii) ID field should have numeric values (only 4-digit).
